

# Jira screenshot

# User story

As a < type of user >,  
I want < some goal >  
so that < some reason >.

# User story examples

As a web developer, I want to be able to add users to Jira so that my coworkers can report bugs.

# User story examples

As a driver, I want my car's dashboard to be voice activated so that I can get directions safely while driving.

# User story examples

As a cashier, I want to have the total calculated for me so that I can give the correct change back to the customer.

# Epic

An epic is a story that is too big for a single sprint. It's broken down into multiple user stories. When those are done, the epic is complete.

# Epics and stories

Epic

Story #1

Story #2

Story #3

# Epic example

## Epic

Core functionality for our notetaking app

## Story

As a driver, I want to be able to record voice notes so that I can take notes safely in my car.

## Story

As a developer, I want to be able to access an API so that I can extend the functionality of the app.

## Story

As a user, I want to be able to share notes with my contacts so that I can collaborate with them.

# **Stories in Jira = User stories**

**Epics in Jira contain  
multiple user stories**

# **Stories in Jira = User stories**

## **Epics in Jira contain multiple user stories**

(Or other issue types, but we'll get into that later in this course)
